So uncertain and cynical are the capitalist powers on the matter of disarmament or even limitation of armaments, that for a long time there has been doubt that the Conference would even be held. But it will be, and each capitalist nation has or is selecting delegates who are to lie or to sow illusions on the prospects of peace for a warweary world.

Characteristically enough, President Hoover has appointed Charles G. Dawes Ambassador to Great Britain, to be chairman of the delegation from the United States Government. Dawes is one of the outstanding jingos in this country-a noisy war-monger who carries the appellation of "Hell N' Maria" Dawes, a biter foe of labor and the Soviet Union. The American delegation will, however, be perfumed with pacifist flowers, among them being Mary Emma Wooley, president of Mount Holyoke College. It is the same with the delegations from other capitalist powers. The bearers of pacifist illusions in a world gentlemen who "keep their powder dry", and the latter will prevail. The Proposal of the Soviet Union These are times to restate fundamentals of class struggle on whatever front it manifests itself. An exposure of the fake disarmament aims of the capitalist powers and proofs that disarmament or peace are impossible and utopian under capitalism, is an absolute necessity if the proletariat is to be able to fight effectively against capitalist imperialism, understand the causes underlying another impending world war, and give the revolutionary answer to the imperialists.

The Soviet Union long ago showed up the hypocrisy of the capitalist nations made a proposal for complete disarmament of all countries and laid its program for disarmament and peace on the table. Imperialist Rivalries

This is an epoch when the imperialist rivalries are not lessened, but, on the contrary, approach the breaking point and can find solution only in capitalist war or proletarian revolution. It is the fear of the latter possibility in an awakening proletariat that holds off for the time being the "solution" of the first. capitalist war. Does anyone with half a mind seriously doubt that, despite all the clap-trap about the "unity and close relations of the English-speaking people", the contradictions and imperialist rivalry between Great Britain and the United States are sharpened? Or that, notwithstanding the visit of the "pacifist" Ramsay MacDonald to the United States, the economic basis for warfare between nations, with the United States and Great Britain as the outstanding rivals, has increased manifold in the past years? Only fools would deny the facts. It is one of the great capitalist contradictions that is heading the world into another

It is precisely this absent condition which makes the situation in Germany today so frau ht with dangers to the international working class. The German Communist Party does not understand its tasks. It has falsely evaluated the present state of affairs with the result that it pursues a policy that is little short of criminal.

The Basis For Fascism

The greatest obstacle in the path of the German proletariat is Fascism. Many workers will undoubtedly question: How is it possible that in Germany there should be such a huge growth of Fascism?

The defeat of the revolutionary sit uation in 1923 gave rise to the present Fascist wave. Fascism in Germany composed of the militarists, the pettybourgeoisie, the administrators, office workers, degenerated unemployed elements (a great part of them youth) sections of the working class disgusted with the betrayals of social democracy and the capitulation of the C. P. G. and seeking new ways out of the present difficulties, receives support from the industrialists and financiers and to an extent from international capital. German capitalism remembers only too a correct policy, there would at the many. It is with this in mind that she from the social crisis and the weakness of the proletariat (expressed in Ger. | violence. It appears that the experi-

In this sense active Fascism signifies the condition of civil war on the part of capitalist society facing the rebelling proletariat. Contrariwise, the bourgeoisie is forced to advance its Left, the social democratic, shoulder in a period that precedes the time of the civil war, so as to deceive the proletariat, to pacify and disintegrate it, or in a period following upon a serious and lasting victory over the proletariat". ("The Strategy of the World Revolution, L. D. Trotsky, Pioneer Publishers, New

Therefore, between the Nazi and the social democracy there is no difference. Hitler is the more extreme wing, the social democracy, the moderate wing.

Parties. But evidently this is not so. The Capitulationist Policy of the Party

The German Communist Party advances numerous theories regarding the Fascist danger—all of them signify capitulation, and the surrender of struggle. The Party first says: There is no Fascist danger. That is all an illusion. The German working class will never stand for the existence of a Fascist dictatorship. But, if this is not enough, the Party continues: It will be a good thing if Fascism comes to power. Such a condition would lead to the unification of the working class and lay the basis for our own seizure of power. In a word, this new theory means that before the working class can seize power it is necessary to go through the school of a Fascist dictatorship which lays the basis for the proletarian dictatorship.

In an effort to win the support of the working class against Hitler, (he recently paid a visit to Tyrol for the purtests because Hitler saw fit to appeal to Italian Fascism which destroyed, "our language", "our culture", and "our traditions" in the Tyrol region. Tasks Before the Plenum of the Needle Trades Industrial Union

E. B. has been announced for the first week in January. This Plenum will take the place of a convention and will therefore have to consider the work of the whole period since the last convention.

The Right wing controlled unions were branded as hopeless companyunions and the building of Left wing opposition groups in them pronouncedfutile. The policies proved wrong. to the root and disastrous for the Left wing. Not growth and expansion followed the convention, but isolation.

A Genuine United Front Imperative

The plenum is confronted at present with one basic problem from which all the others follow. The sentiment for united front and for one union has become the outstanding issue of the day. The Industrial Union, as well as the reformist unions, cannot any more dull the voice of the workers for unity. The future of the Left wing in the trade unions depends largely upon the correct Union and the utter ignorance of the gle against the bosses and the Right wing solution of the problem of unity. The latest mechanical gesture of the leadership in going through the motions of united front action in the Dress Trade, and the distorted manner of applying being lost sight of. The Left wing has united front tactics, as exemplified by as yet not considered nor made mention the Furriers of which the Militant, (Nov. 24, 1931) spoke, confronts the Left wing with many new contradictions. The Left wing must strive for unity in such a way that it will rise in the eyes of the workers and gain strength in the struggle with reformism. What the Left wing has done up till now is the exact opposite.

Unity over the heads of the bureaucratic officials would be very desirable if it were possible—but unfortunately this is not the case.

But it is perfectly in line with Communist principles for the Left wing to demand unity from the Right wing bureaucrats on the basis of a struggle against the bosses, to call them to conferissue of unity; to send committees to the Executive and Joint Board, etc. Nor must we necessarily demand a majority at the conference as a prerequisite for trade unwas held under the banner of the "third before the workers and to make our expose the Right wing fakers and to endeavor to build one union, we must strive to gain all possible *concessions from the Right wing to assure a fighting chance for the militant workers. The great number of Italian, Spanish and Negro workers in the dress trade requires special attention and an organization campaign, well equipped with language speakers and language literature. These workers realized that under these conditions it will be a difficult task to get aid of the scabs in the Workmen's Circle. They have appealed to the National Executive Committee of the Workmen's Circle to dispense with the ordinary rules of procedure because of to deal with the scab problem in the W. C. of Paterson. The reply was: "We must obey the laws of the constitution". But in the struggle against the militants and Left wingers they spoke differently. "To hell with the constitution" was the slogan then.

The unstable nature of the "equilibrium" of French economy, pointed out in a recent article in the Militant, will lead to an immense piling-up of contradictions and sharpening of the class struggle when French capitalism attempts to put through its solution of the crisis in Government Prospects for Jewish ting the pay of Government employees, and attempts to cut wages in industry at a time when living costs are adjusting themselves to the international level.

The sharpening of the industrial crisis and its development to a higher level, that of the financial crisis, has been exemplified by the declaration by Hungary of a moratorium on at least two-thirds sixty billionth of the national wealth of and industry". P. bureaucrats cannot divorce themselves from these elements, their chief supporters, who have become a decisive factor in the Workmen's Circle.

A Movement For A Special Conference

The Paterson workers seem now to have realized this. They know that this is not a Paterson affair only. It involves the very existence of the organization, sometimes called the "Red Cross" of the Jewish labor movement. The Paterson workers, members of the Workmen's Circle, have sent out a clarion call to rally the broad membership of the Workmen's Circle around this strug-

gle. So far, the New York District has responded, and the response is a very encouraging one. This call was first published in the Jewish Day and, after against the United Textile Workers of a delay of three weeks, in the Freheit. An organization has already been formed for the purpose of calling a Special Conference of the branches of New York, New Jersey and Connecticut.

This movement must be supported by every class conscious worker. The issue is clear-cut. "The scabs must be driven out of the Workmen's Circle!" "The leadership that makes it possible for scabs to belong to the Workmen's Circle must go!"

There are great opportunities for the Left wing movement, as well, of course, as serious dangers. In another article I will deal with various points and the role the Party and Communists should play. —J. B.

Paper Bright

The preliminary work for the early publication of the Jewish organ of the Communist League of America (Opposition), Unser Kamf is well under way. We are now ready to announce the editorial board of the paper. It will consist of comrades: M. Lewit, Albert Orland, and F. Rubinstein. Sylvia Blecker has been chosen Business Manager. As yet we cannot with certainty announce the exact day of its appearance. We are aiming to have Unser Kamf out on the fifteenth of January.

Will we suceed in that? The answer to this question lies with our comrades and sympathizers throughout the country. We have not yet received all the payments on the pledges.

Rush your contributions immediately, so that there may be no delay in the appearance of Unser Kamf.

From the manuscripts we have at handd, we can say that the first number of Unser Kamf promises to be very rich in content. No worker will want to miss the first issue—and we are sure—the issues following. The only way to assure yourself of a copy of Unser Kamf is to subscribe. For one dollar (Canada \$1.25) the paper will be mailed to you for one year (26 issues).

From the activity of this government three decrees are known, and one of them, by the way, speaks of the preparation of a triumphant reception for Chiang Kai-Shek who was ex- cause he had merely carried out their pected to arrive in Shanghai.

In Shanghai at this time the relations between the army and the workers grew sharp. It is known, for instance, that the army (that is, the Chiang Kai-Shek officers-L. T.) consciously drove the workers into slaughter. The army for a period of several days stood at the gates of Shanghai, did not want to enter the city because they knew that the workers were battling against the Shan Dunts, and wanted the workers to be bled in this struggle. They expected to enter later. Afterward the army did enter Shanghai. But among these soldiers there was one division that sympathized with the workers-the first division of the Canton army; the commander, Say-O, was in disfavor with Chiang Kai-Shek, mass movement, because this Say-O himself came from the ranks. He was at at first the commander of a company and presently he commanded a division.

"Say-O came to the comrades in Shanghai and told them that there was a military overthrow in preparation, that Chiang Kai-Shek summoned him to headquarters, gave him an extraordinarily cold reception and that he, Say-O, will not go there any longer because he is afraid of a trap. Chiang Kia-Shek propsed to Say-O to get out of the city with his division and to go to the front; and he, Say-O, proposed to the Central Committee of the Communist Party to agree with him not to subordinate himself to the order of Chiang Kai-Shek. He was ready to remain in Shanghai and together with the Shanghai workers to fight against the military overthrow that was in preparation. To these our responsible leaders of the Chinese Communist Party, Chen Du Hsui included, declared that they know about the overturn that is in preparation, but that with Chiang Kai-Shek and that they proposed to Say-O that either he goes to the front or that he retires, in order to prove his loyalty to Chiang Kai-Shek. The First Division was let out of Shanghai, the city was occupied by the Second Division of Bai-Sung Gee and, two days later, the Shanghai workers were shot down.

Why was this truly stirring narrative left out of the Minutes (P. 32)? Because it was not at all a question of the Chinese Communist Party but of the Polit Bureau of the Soviet Union.

On May 24, 1927, Stalin spoke at the Plenum of the L. C. C. I.:

"The Opposition is dissatisfied because the Shanghai workers did not enter into a decisive battle against the imperialists and their myrmidons. But it does not understand that the revolution in China cannot develop at a fast tempo. It does not understand that one cannot take up a decisive struggle under unfavorable conditions. The Opposition does not understand that not to avoid a decisive struggle under unfavorable conditions (when it can be avoided),means to make easier the work of the enemies of the revolution . . .

The Kuo Min Tang is in "need of work- munist Party of the Soviet Union: ers and peasants blood". The "aid" was rendered in the fullest measure: in April-May, Chiang Kai-Shek and Wang Chin-Wei received a sufficient of workers and peasants blood.

In regard to the Chiang Kai-Shek chapter of the Stalinist policy the eight Plenum (May, 1927) declared:

"The E. C. C. I. assumes that the tactic of the block with the national bourgeoisie in the already declining period of the revolution was absolutely correct. As historic justification of this tactic even (!) this one northern expedition serves. . . .

And how!

Here is Stalin in his whole stature. C. C. I. has done everything to make it impossible to draw the lessons of the blood-bath of Chinese workers.

8. Stalin Repeats His Experiment With the "Left" Kuo Min Tang

Further on, the following remarkable point is left out of Chitarov's speech: "After the Shanghai coup, it has become clear to everyone that a new epoch is beginning in the Chinese Revolution; that the bourgeoisie is retreating from the revolution. This was recognized and immediately so stated. But one thing was left out of sight in connection with this,—that if the bourgeoisie retreats from the revolution, the Wuhan government did not exen think of leaving the bourgeoisie. Unfortunately among the majority of our comrades this was not understood; they had illusions in respect to the Wuhan government. They considered the Wuhan government almost an image, a prototype of the democratic dictatorship of the proletariat and peasantry". (The omission is on

page 33). "After the Wuhan overturn it became clear that the bourgeoisie is retreating

Is it clear where the center of the revolution is? In Wuhan!

"This means that the revolutionary Kuo Min Tang in Wuhan, leading a decisive struggle against militarism and imperialism, will in reality be transformed into an organ of the revolutionarydemocratic dictatorship of the proletariat and peasantry". . . .

Now we finally know what the democratic dictatorship of the proletariat and peasantry looks like!

The slogan of Stalin-Rafes was: "Without the workers, but with Chiang Kai-Shek". "Without the peasants, but with Wang Chin-Wei!" "Against the Opposition, but for the Kuo Min Tang!".

10. Stalin Once Again Disarms the Chinese Workers and Peasants

What was the policy of the leadership during the Wuhan period of the revolution? Let us listen to the Stalinite Chitarov on this question. Here is what we read in the minutes of the 15th Con-

"Under the slogan of retreat"—in the revolutionary period, at the moment of the highest tension of the revolutionary struggle; the Communist Party works, and under this slogan surrenders one position after another without a battle. To this surrender of positions belongs: the agreement to subordinate all the trade unions, all the peasant unions and other revolutionary organizations of the Kuo Min Tang; the refusal of independent action without the permission of the central Committee of the Kuo Min Tang; the decision for the voluntary disarming of the workers' pickets in Hankow; the dissolution of the pioneer organizations in

We must therefore immediately retreat in order to save the possibility of legal work. and, if we will retreat, then we will save this possibility, but if we will defend ourselves or attempt to advance then we will lose everything".

Precisely in those days (end of May 1927) when the Wuhan counter-revolution began to crush the workers and peasants in the face of the Left Kuo Min Tang, Stalin declared at the Plenum of the E. C. C. I. (May 24, 1927):

On its part the VIII Plenum of the E. C. C. I. which was in session at the end of May, 1927, that is, at a time when the crushing of the workers and peasants organizations in Wuhan had already begun, adopted the following decision:

The Fundamental Struggle: For Capitalism or Communism

And lastly, there is the outstanding contradiction, the historical contradiction between the imperialist powers of the world and the Union of Socialist Soviet Republics. For this the "Disarmament Conference" has no solution except war. And it is this war against the Workers Republic, based upon the fundamental centradiction of capitalism and Communism, that the capitalist powers are preparing. There is no answer to the existence side by side of a capitalist world and a country aiming for the abolition of all forms of capitalist exploitation and ideology, except a struggle between them for supremacy. That War and militarism must be approachcan only be by the destruction of one ed by the working class from a class and the victory of the other on a world standpoint. They are class problems, scale. This economic, social and political contradiction in the world today—a capitalist world and a Soviet Russiacan find no solution, nor even a beginning of one, in a League of Nations, the Soviets of workers' deputies in this Kellogg Pact or Disarmament Conferences. The answer can only be: the domination of international capitalism navies, armies, airships-all are unor international Communism.

The Soviet Union, under the aegis of Stalin, Litvinoff, et al, has most unfortunately assisted in the sowing of illupeace talk, by being a signator to the Kellogg Pact, a capitalist instrument aimed, in the last analysis, at clipping the wings of the Soviet Republic, disarming and destroying it. The propaof peaceful co-habitation side by side indefinitely, of the Soviet Republic and the capitalist world only plays into the hands of the bourgeoisie and the muddled pacifists and confuses the working pending final struggles between the workclass which must see the problem of war and peace as a class problem.

ism and war. Pacifism is the only way in which this group finds it possible, with its limited consciousness of today, to express its resentment and opposition to capitalist warfare. Students, overwhelmingly from the middle class, make up the "militant" section of the pacifist movement. But, when all is said and done, when the war drums begin to throb, they will answer the call of "Tommy Atkins" and the "doughboy". Until these elements, the petit-bourgeois, grasp the class outlook, the proletarian concept of the causes of war, their movement is doomed

to sterility. "Conscientious objection, anti-war strike, and so on," says Lenin, "are just stupidities, pitiful and poor-spirited dreams of unarmed struggle against the armed bourgeoisie, of the ending of capitalism without a desperate civil war or a series of wars . . . Away with the

parsonical, sentimental, absurd dreaming about 'peace at any price' ' That is why, too, all the post-war literature of pacifism, the horrors of war, have no lasting impression or genuine value for a solution to the war problem.

Militarism and War: A Class Problem War is a manifestation of capitalist society: it occurs when there is no other way out of the impasse of capitalist rivalries or rivalry today between contending social systems: capitalist society and the Soviet Republic. War remains as long as capitalism remains. Armanents, avoidable while these class divisions and rivalries exist. Capitalist Disarmament Conferences can do nothing about this-except to play the game of the sions, of pacifist nonsense, of fraudulent capitalists. It is a matter of class struggle. Capitalist militarism has found in the imperialist epoch its class rivalthe Red Army of the Soviet Union, the protector of the class interests of the proletariat in the Soviet Union and the entire world.

The future lies, not with pacifism, but in a recognition by the working class of the world that it must prepare the organization of all its forces for the imers and the capitalists. Not pacifismbut class war. Not "national security and defense": not social-patriotism and nationalism—but international solidarity and organization of the proletariat.

EVIDENCE MADE TO ORDER

The trial of the gangsters, Coll and Giordano, on murder charges, which resulted in the acquittal of the defendants, throws a glaring searchlight on "justice" as it is administered in New York. The men were "positively identified" as the men who fired the shots in the baby killing last Summer by a witness who had been on the police payroll for mouths and kept secluded in a hotel under guard. Brecht, the police witness, did not merely think they might be the killers. He knew it. He was an "eye witness" to the shooting, and he swore that Coll and Giordano were the men he saw spraying bullets from the auto, And then, all of a sudden, the prosecution's case went to pieces. Brecht was exposed by the defense counsel as a professional "identifier" and perjurer, a thief, ex-convict and all-around scoundrel -a sort of a Hoyle. It was, even dis closed that he had "identified" the defendants some years ago in a similar case in St. Louis and that on that occasion, also, his testimony had been discredited. Following this bomb-shell the case collapsed and the court ordered an acquittal.

Victims of the frame-up system of American justice are not always so fortunate. The police in this case made the mistake of picking on real gangsters with money and influence. They were able to employ competent legal counsel. They had the means to finance investigations. They owe their acquittal to these circumthey had been friendless men, without Left Opposition. The Revolutionary Age cover the length of our stay. money or connections, they would be on the way to the electric chair already munist League in the Greek languagewithout a doubt.

The police frame up their victims all the time as a matter of routine, as a Chinese Revolution, and not enough habit. We have seen the revelations of women framed as prostitutes. During the Greco-Carillo case a few years ago a veteran newspaper man covering the trial remarked: "Half of the fellows who go out of this court room to prison are convicted on fake evidence. Everybody knows that. If these two men don't go up, it will be because they have good lawyers and influential friends." This is the record and the reputation of the New York police and prosecution system among all informed people. If the use of perjured evidence and third degree intimidation are used systematically in ordinary criminal cases day by day, what man in his right senses would trust them to deal justly and fairly with de fendants in a labor case?

The stage was all set for a speedy railroading by the time-honored methy Workers Defense Committee and to ods in the case of the indicated marine vote a donation for the expenses of its workers, Soderberg, Bunker, and Trajer. The formation of a defense committee and the employment of qualified attorneys have introduced a few "complications" into the game. To that end we must work with all our strength in the time that is left before the trial.

FOREIGN LANGUAGE PROBLEMS

The appearance of a Greek organ of the Left Opposition in America, and the projected early publication of a Jewish paper, will no doubt extend the propaganda effectiveness of our movement to a considerable extent. At the same time these developments pose before the Communist League, for the first time in its put off and wear out the question. The experience as a distinct organization, one of the most difficult and complicated taken unawares, is to postpone action problems—the problem of coordinating and centralizing a movement which is compelled, by the force of circumstances in the country, to speak in many ton-

Foreign language speaking workers constitute an important—even if not the ter. most decisive-section of the American proletariat. To carry the message of Communism to them and to unite them with the native workers in a single movement is a task that American Communism has stumbled over more than once in the past. We ought to learn from the costly mistakes of the past Party experience in order to avoid them in our own work as a faction.

The problem is political, first of all. Organization difficulties, which have in the past assumed tremendous importance, flow from the political essence of the guestion. As Marxists we can do no other than aim at a centralized movement which carries an identical message in every language, and always acts as an organizational unit. Special language organizations cannot have an independent National Tour of comrade Arne Swabeck existence under our banner. The Left Opposition has no use for autonomous language groups.

We found comrade Trotsky in good spirits despite the extreme hardships of his exile. He must write in order to live and this in a sense is a handicap in that it does not allow him to concentrate all his thoughts and energies on the International Opposition. We talked about life in Turkey, and often its humorous though tragic sides would come in for discussion. The fire that broke out almost a year ago destroyed his library and a box of valuable clippings that were collected over a period of years.
